A Full Service Resource For All Your Electrical Needs...

Interstate Electrical Services is a full service contractor specializing in

- electrical construction
- maintenance and repair services
- network infrastructure
- process/building controls installation and maintenance.

Located in North Billerica, MA; Interstate is staffed and ready with the expertise, resources and commitment to excellence your project needs, regardless of scope, or deadline.

Since the company was founded in 1966, we have remained true to our vision – partner with you and insure the success of your project. Because, ultimately your success is our success. Our project teams

- Dedication to customer satisfaction
- Focus on Safety
- Leadership
- Commitment to deliver every project on time and on budget

These are powerful advantages for our clients who time and again provide us with the ultimate reward: repeat business.

One Stop for All of Your Electrical Service Needs

When you partner with Interstate you have access to a wide range of value-added services, resources and expertise:

- In-house engineering, design, CAD, and Building Information Modeling (BIM).
- Expert network and communication infrastructure installation and maintenance
- Process and building controls installation, testing and maintenance
- Fire alarm and life safety installation, testing and maintenance
- Clean room installation and maintenance
- Energy Services – reduce energy consumption and save money

Life Science, Manufacturing, Health Care and More...

Electrical Construction

Interstate leads the industry in electrical construction for technology, life sciences, institutional, corporate, industrial, commercial, retail and health care clients. With Interstate as your partner, your project benefits include:

- A team of the most experienced project managers and site superintendents in the industry
- A commitment to site safety that is second to none
- Leadership by example that extends to the entire job site
- The fiscal strength and resources of one of the largest electrical services contractors in New England

Electrical Services

Interstate's Electrical Services Group delivers responsive, reliable maintenance and repair services as well as small project construction and renovation services to clients in commercial, retail and manufacturing, as well as to property managers and general contractors.

- 24/7 emergency call service
- Facility maintenance
- Building automation system installations
- In-house design build
- Fire alarm system installation, testing and maintenance
- Security card access systems
- Thermal Diagnostic Imaging

Network Systems & Controls

Data and telecommunication infrastructures are critical components for any business. Just as building and process controls are to keep the physical plant and manufacturing floor functional. These systems are as complex as any core electrical system requiring an expert to install and maintain them. Interstate employs staff specialists, trained and certified in the installation and maintenance of these mission critical systems.

Autodesk

This was a fast track interior fit-up of a recently completed LEED Gold certified core/shell office for software powerhouse Autodesk. This was also the very first IPD (Integrated Project Delivery) project in the Northeast. The scope of work for this expressive 61,000 square foot office fit up included electrical distribution, lighting and tel/data. The lighting package was designed to achieve maximum LEED points (Autodesk was seeking platinum certification) and required precise installation since the lights were oriented in such a way to provide maximum illumination from the fewest number of fixtures.

Autodesk was not just the owner – they were an active participant, using this opportunity to put their Revit software to the test as a cross-functional building information modeling platform. They also purposefully compressed the project schedule hoping to prove that a revolutionary project management model (IPD) combined with the latest in 3D CAD visualization software would enable the project team to dramatically accelerate the project time line and still deliver an ultra high quality end product.

The project was delivered on time and to the complete satisfaction of the client.

I would like to commend the entire Interstate team for their exemplary performance. In addition to a difficult schedule, lack of physical space around the building and significant interior masonry work, the Interstate team approached each situation with a positive outlook that instilled great confidence. That confidence was backed by a work ethic and dedication to quality that I have rarely seen.
